Location
Toulouse, France

LANGUAGES

French	- Fluent & Professional
English	- Fluent
Spanish	- Intermediate
Arabic	- Near fluent

SKILLS

Programming
Python, JavaScript, HTML, CSS

Web
Django, front-end fundamentals

Tools
Visual Studio Code, Adobe Premiere Pro

Engineering
Numerical simulation, modelling, control systems

STRENGTHS

- Analytical thinking
- Teamwork
- Adaptability
- Discipline

PROFILE

Digital Sciences engineering student at ENSEEIHT - Toulouse INP, after two years of intensive CPGE training in Casablanca. Interested in artificial intelligence, cybersecurity and software, with a strong foundation in mathematics, algorithms and applied problem solving.

EDUCATION

Engineering Degree (Master's equivalent) · Digital Sciences

ENSEEIHT - Toulouse INP
2026 - present | Toulouse, France

- First year of the engineering cycle (third year of higher education).

Preparatory Classes (CPGE)

Lycée La Résidence
2024 - 2026 | Casablanca, Morocco

- Two years of intensive mathematics and physics training for French engineering-school entrance examinations.

French Baccalauréat

Lycée La Résidence
2021 - 2024 | Casablanca, Morocco

- Graduated with Mention Très Bien.

EXPERIENCE

Video Editor · YouTube Content

Short-term professional collaboration
Remote

- Edited online video content with Adobe Premiere Pro, focusing on pacing, visual continuity and creator requirements.

Pharmacy Observation Internship

2022 | Two weeks | Casablanca, Morocco

- Early exposure to customer interaction, organisation, accuracy and responsibility in a professional environment.

PROJECTS

Study of the Cycle of an ABS System

Personal Academic Research Project (TIPE)
2025 - 2026 | Casablanca, Morocco

- Modelled wheel and vehicle dynamics and compared braking strategies using Python simulations.
- Connected feedback control to an electrical analogue using a Schmitt trigger and RC oscillator.

Computer Guessing Game

ENSEEIHT · Imperative Programming
2026 | Toulouse, France

- Worked on an interactive guessing assignment using binary search, structured control flow and consistency checking.

eBay-style Marketplace Clone

Early personal web-development project
2022

- Explored Django, server-side logic, routing and the interaction between HTML, CSS and JavaScript.

INTERESTS & ACTIVITIES

Running

- Currently training toward completing a marathon.

Football, Volleyball & Guitar

- Recreational activities combining teamwork, coordination and creativity.

Community Service

- Helped with a charitable meal-distribution initiative and previously provided tutoring/support to older women.
